

Keywords Field — Generation Rules (Developer Spec)

This governs how the **Keywords** field (Contentful metadata tab) is generated. It has two distinct parts that serve different purposes: general SEO/content tags, and a backend alignment tag that surfaces articles on Payden's own Strategy/Fund pages.

1. Content-based keywords (baseline, ~10 terms)

Pull roughly 10 terms directly from the article's actual body content — named entities, specific topics, and themes that genuinely appear in the piece (specific countries, institutions, policy actions, asset classes mentioned, etc.).

Rank by relevance to the piece, not raw word frequency. Frequency-based extraction surfaces filler words, not useful tags — the goal is the terms a search engine or internal search would actually associate with this piece's substance.

Hub/landing pages: skip content-specific extraction entirely — there's no single body to pull named entities from, and the linked articles inside one hub can span unrelated topics (e.g. prediction markets, geopolitics, AI infrastructure, all in the same Point of View volume). Use generic series/volume identifiers instead. Confirmed example: Point of View, Payden Point of View, Point of View Vol. 2, Point of View Vol. 2 2026, Payden & Rygel Insights.

2. Strategy & Fund alignment tagging (new rule, additive)

Purpose: articles get tagged on the backend so they surface on the matching Strategy or Fund page's filter. This is separate from and additive to the content-based keywords above — it never replaces them, and the total keyword count can run past 10 when a strategy/fund match applies.

After drafting the content-based keywords, check whether the article's subject matter aligns with any of Payden's own strategies or funds, using the reference list in section 3.

- **Broad category match** — the article discusses a strategy category generally (e.g. fixed income markets broadly) without focusing on one specific named sub-strategy: tag with the generic category label, singular — Fixed Income Strategy, Equity Strategy, Unconstrained Strategy, Balanced Strategy.
- **Specific match** — the article closely aligns with one particular named sub-strategy or fund: tag using that item's exact name as it appears on the site, or its confirmed internal alias — e.g. Core & Core Plus Strategy, Payden Core Bond Fund.
- **Both can apply** — if an article aligns with both a specific sub-strategy and its related fund (the confirmed Core & Core Plus / Core Bond case), tag both.
- **Don't force it.** Only add a strategy/fund tag when the content genuinely aligns with one. Not every article needs one — a loose or generic connection doesn't count, since the whole point is a

reliable backend filter, not maximal tag coverage.

3. Reference list (static — manual updates required)

This list does not get re-fetched from the live site on each run. It reflects payden.com as of 2026-08-19. **Whoever owns this skill needs to update it by hand whenever Payden launches, retires, or renames a strategy or fund** — there is no automatic sync. If that update doesn't happen, new products silently stop getting tagged correctly.

Strategies

Category (tag as {Category} Strategy)	Named sub-strategies (tag with exact name)
Fixed Income	Core & Core Plus Strategy (aka "Core Bond"), Enhanced Cash & Low Duration, Emerging Markets Debt, Global Fixed Income, GNMA, High Yield, Investment Grade Corporates, Liability Driven Investing (LDI), Municipal, Securitized Income, Strategic Income, U.S. Government Bonds
Unconstrained	Absolute Return Strategy (aka "PARI"), Multi-Asset Credit Strategy
Balanced	U.S. Balanced Strategy, Global Balanced Strategy
Equity	Equity Income Strategy (no further sub-strategies)

Funds (fund-family level — do not tag individual share classes separately)

Category	Fund names
U.S. Funds	Payden Absolute Return Bond Fund, Payden California Municipal Social Impact Fund, Payden Cash Reserves Money Market Fund, Payden Core Bond Fund, Payden Corporate Bond Fund, Payden Emerging Markets Bond Fund, Payden Emerging Markets Corporate Bond Fund, Payden Emerging Markets Local Bond Fund, Payden Equity Income Fund, Payden Floating Rate Fund, Payden Global Fixed Income Fund, Payden Global Low Duration Fund, Payden GNMA Fund, Payden High Income Fund, Payden Limited Maturity Fund, Payden Low Duration Fund, Payden Managed Income Fund, Payden Securitized Income Fund, Payden Strategic Income Fund,

	Payden U.S. Government Fund
	Payden Absolute Return Bond Fund, Payden Global Aggregate Bond Fund, Payden Global Emerging Markets Bond Fund, Payden Global Equity Income Fund, Payden Global Government Bond Index Fund, Payden Global High Yield Bond Fund, Payden Global Inflation-Linked Bond Fund, Payden Global Investment Grade Corporate Bond Fund, Payden Global Short Bond Fund, Payden Sterling Reserve Fund, Payden US Core Bond Fund, Payden US Dollar Liquidity Fund, Payden USD Low Duration Credit Fund
UCITS Funds	
AIF	Payden Multi Asset Credit Fund (only fund currently in this category)

Aliases: some strategies/funds carry an internal colloquial name that doesn't match the official on-page title. Confirmed case: "Core Bond" is used internally for "Core & Core Plus Strategy." Only one alias is confirmed today — if others exist, they need to be added to this list explicitly. A developer/model matching article content against this list has no way to know an unlisted nickname refers to one of these items.

4. Output format

Each keyword — content-based and strategy/fund tags alike — renders as an individually copyable pill, plus one "copy all" action that joins all of them comma-separated.

Known open gaps (not yet resolved — flagging rather than guessing)

- No rule on singular vs. plural form for content-based keywords (e.g. "bond" vs. "bonds").
- No rule on mixing branded vs. generic terms within the ~10 content-based keywords.
- No enforced minimum/maximum count — "roughly 10" is not a hard rule.
- No guidance for a thin piece that can't support 10 distinct relevant terms.
- List freshness is fully manual (see section 3) — confirmed acceptable for now, but there's no reminder/trigger built in when a new fund or strategy launches.
